The local money market was easy, January disbursements causing lower rates in call money and a somewhat more active time money and commercial paper market. Money on call representing bankers' balances ruled at 11-262 per cent, with banks and trust companies quoting senting bankers bankers that at 1942 becent with banks and trust companies quoting 2 per cent the minimum. Time money was more freely offered, rates ruling at 2½ per cent for sity days, 32% per cent for three months, and 3464 per cent for longer periods. Commercial paper rates were 3½64 per cent for the best names for all periods and above for paper not so well known. A fair amount of paper was on the market and the demand was good from all the banks at the end of the week. In London call money was higher at 2½ per cent, with open market discounts for short and long bills 3½ % per cent. The Bank of England's minimum rate of discount remained unchanged at 4 per cent. In Paris the open market rate was 2 per cent. The Bank of England gained 1352 193. bullion in the week, and held at the close £34.—\$18,092.

The foreign exchange market was easy until Tuesday afternoon, when it recovered rapidly and continued firm the rest of the week, demand sterling advancing "4" I per cent from its lowest figure of the week. The legitimate demand for exchange was not materially heavier in the week but there were evidences of manipulation in the advance in rates, and the difference between local and foreign money rates was again a factor in the market. Long sterling which matured was renewed in many instances, and the long bills which were offered for sale were rapidly absorbed. Renewing investments in long sterlong bills which were offered for sale were rapidly absorbed. Renewing investments in long sterling reflected the belief that money rates here would continue to rule low, while those in London would advance again, open market discounts closing the week at 3% per cent against 2% at the first of the year. The market closed steady with posted sterling at 4.84%-44.85 and 487%-4.88 for long and short bills respectively. Rates for actual business closed as follows:

RAILROAD EARNINGS.

Tribune has printed the gross earnings of y-five railroads or systems for the fourth ek in December. Of these thirty-five returning of \$1,003,422, or 16.1 per cent, and twenty fourn losses of \$147,389, or 8.0 per cent. The note shows a gain of \$856,033, or 10.6 per cent.

THE WEEK IN WALL STREET.

The course of prices in the security market last week gave some evidence that a better appreciation of the outlook for improvement in the business situation was obtaining among investors and speculators in stocks. It requires careful and skifful treatment to restore a sick country to health, and it needs on the part of the doctors and watchers great confidence and patience, and broad-minded, cheerful and optimistic sentiment by all who would see the patient again enjoying the blessings of health and prosperity. Medicine adequate to cure the country's ills was given in November, but the beneficent effects of the treatment have to be developed by long, patient and intelligent nursing, and while the gradual restoration of health is being accomplished the watchers should not allow themselves to be overpowered and depressed by their impatience and petulant and pevish sentiments. Intelligent judgment of underlying conditions now appears more pronounced. The fear inspired by the fire-eating resolutions introduced by Senator Cameron seems to be falling into nothing more than an unpleasant memory, and the financial community and business circles in general are exhibiting courage and bravery, and taking less notice of The course of prices in the security market
